EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William L. Brooks (Reg. No. 34,129) on 22 December 2004.

The application has been amended as follows:

a) In the Title:

After "dots", insert -- Having Internal Tensile or Compressive Strain--

b) In the Claims:

In claim 12, line 1, after "device", insert --an active layer and--

line 2, before "tensile", insert --internal--

line 2, before "compressive", insert --internal--

line 2, delete ".", and insert -- wherein said internal tensile strain quantum dots and said internal compressive strain quantum dots are dispersed on the same active layer.--

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: in claim 12, line 2, the prior art teaches quantum dots having either internal net compressive or tensile strain in an optical device. However, claim 12 teaches an optical device having

quantum dots with both types of strain on the same layer. The prior art of record fails to teach, in combination, the process features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William M. Brewster whose telephone number is 571-272-1854. The examiner can normally be reached on Full Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri can be reached on 571-272-1855. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
